

QP CODE: 24806045

Reg No : .....

Name : .....

**M.C.A. DEGREE EXAMINATION, NOVEMBER 2024**

**First Semester**

Faculty of Technology & Applied Science

Master of Computer Application

**CORE - MCACT103 - STRUCTURED PROGRAMMING IN C**

2020 Admission Onwards

FB639D43

Time: 3 Hours

Maximum: 75 Marks

**Part A**

*Answer any **ten** questions*

*Each question carries **3** marks*

1. Compare getchar() and putchar() function.
2. How can you evaluate arithmetic expression in C?
3. Classify the preprocessor directives.
4. What is function call statements?
5. What are the various categories of functions?
6. Define external variables.
7. Explain the declaration and initialization of one- and two-dimensional arrays with example.
8. Explain how to pass 2-D array to a function with example.
9. Briefly explain array of pointers with an example.
10. Explain the concept of pointer to pointer with an example.
11. State the purpose of fclose() function?
12. What is the advantage of using enumeration variables within a program?

(10×3=30 marks)

## Part B

Answer **all** questions

Each question carries **9** marks

13. a) Describe the features of structured Programming..

OR

b) Write note on C Character Set.

14. a) Explain various storage classes in C

OR

b) What is recursion? Explain the working of recursion with an example.

15. a) Explain the merits of using array structure.

OR

b) Discuss the storing and accessing of values in multidimensional arrays.

16. a) Create a structure for an employee with following information:- empid, name and salary. Write a program to read the details of 'n' employees and display the details of employees whose salary is above 10000. Use array of structures

OR

b) Discuss on self- referential structures.

17. a) Explain different File Management Functions

OR

b) Write a C program to copy one file content to another file.

(5×9=45 marks)
